Standard Chartered PLC Disclosure for Global Systemically Important Institutions (G-SIIs)

31 December 2019

Standard Chartered PLC

Global Systemically Important Institutions (G-SIIs) Disclosures

Background

In July 2013 the Basel Committee for Banking Supervision ('BCBS') published a framework, "Global systemically important banks: Assessment methodology and the additional loss absorbency requirements" which outlines the methodology for assessing global systemically important banks. The framework was published in response to a request from the Financial Stability Board ('FSB') as part of a series of measures aimed at raising the quality and quantity of capital in the banking system. The G-SIB framework established by the FSB and the BCBS is implemented in the EU via CRD IV and G-SIBs are referred to as Global Systemically Important Institutions ('G-SIIs').

The BCBS conducts an annual data gathering exercise as input into the methodology for assessing the systemic importance of banks in a global context. It includes the reporting of 12 indicators, grouped in five categories of systemic importance concerning size, interconnectedness, substitutability/infrastructure, complexity and cross-jurisdictional activity. The aim of the exercise is to increase capital requirements for institutions deemed systemically important and the requirement will vary depending on each bank's relative size.

The European Banking Authority ('EBA') published final draft regulatory and implementing technical standards ('RTS', 'ITS') and guidelines on the methodology and disclosures for G-SIIs on 13 January 2016. Furthermore, the BCBS published updated instructions for its annual data gathering exercise on 15 January 2020. Both publications require G-SIIs to publicly disclose the twelve indicators for the identification of a G-SII.

Capital buffer requirements

G-SIIs are required to hold an additional buffer of Common Equity Tier 1 ('CET1') capital between 1% and 3.5%, depending on the score from the assessment methodology. The buffers ensure that G-SIIs maintain additional capital to absorb potential future losses. The G-SII buffer was phased in from January 2016 to January 2019.

Standard Chartered PLC ('the Group') has been designated a G-SIB by the Financial Stability Board since November 2012 and has been categorised with a 1.0 per cent G-SII CET1 buffer which was fully implemented as of 1 January 2019.

Basis of preparation

The G-SII indicators for the Group at 31 December 2019 are presented below. The data has been prepared in accordance with the Group's interpretation of the instructions provided by the BCBS and EBA and, as such, may not be comparable with other disclosures. G-SII disclosures are made on a regulatory scope of consolidation, rather than an accounting basis, for most data points.

General Bank Data

Section 1 - General Information

- a. General information provided by the relevant supervisory authority:
- (1) Country code
- (2) Bank name
- (3) Reporting date (yyyy-mm-dd)
- (4) Reporting currency
- (5) Euro conversion rate
- (6) Submission date (yyyy-mm-dd)
- b. General Information provided by the reporting institution:
- (1) Reporting unit
- (2) Accounting standard
- (3) Date of public disclosure (yyyy-mm-dd)
- (4) Language of public disclosure
- (5) Web address of public disclosure
