Overview

During 2013, the Bank of Thailand (“BOT”) published the notifications re. Disclosure of Capital Maintenance of Commercial Banks and Disclosure of Capital Maintenance of Commercial Banks under Consolidation which are based on “Basel III: A global regulatory framework for more resilient banks and banking systems” (Revised Version: June 2011) from the Basel Committee on Banking Supervision (“BCBS”). The objectives of these notifications (commonly referred to as “Basel III”) are to strengthen capital rules with the goal of promoting a more resilient banking sector. The objective of the reforms is to improve the banking sector’s ability to absorb shocks arising from financial and economic stress, whatever the source, thus reducing the risk of spillover from the financial sector to the real economy.

1. Scope of Basel III Framework

Pillar 1: Minimum Capital Requirement

The BOT has approved Standard Chartered Bank (Thai) PCL (“the Bank”) and its Financial Business Group (“the SCBT Group”) to adopt the AIRB approach which is more advanced risk management framework for the measurement of credit risk capital and under the notification, the SCBT Group and the Bank have been using AIRB approach for the credit risk capital calculation as regulatory capital since December 2009.

The SCBT Group and the Bank are also required to calculate a capital charge to cover market risk and operational risk for which the SCBT Group and the Bank apply the Standardised Approach.

Pillar 2: Supervisory Review Process

Pillar 2 requires banks to undertake a comprehensive assessment of their risks and to determine the appropriate amounts of capital to be held against these risks where other suitable mitigants are not available. This risk and capital assessment is commonly referred to as an Internal Capital Adequacy Assessment Process (“ICAAP”) which covers much broader risk types than Pillar 1, which cover only credit risk, market risk, and operational risk.

The SCBT Group and the Bank have developed an ICAAP policy and framework which closely integrates the risk and capital assessment processes, and ensures that adequate levels of capital are maintained to support the SCBT Group and the Bank’s current and projected demand for capital under expected and stressed conditions.

Under Pillar 2, the BOT would undertake a review of the SCBT Group and the Banks’ ICAAP. This is referred to as the Supervisory Review and Evaluation Process (“SREP”).

Pillar 3: Market Discipline

Pillar 3 aims to provide a consistent and comprehensive disclosure framework that enhances comparability between banks and further promotes improvements in risk practices. According to the BOT notification, The SCBT Group and the Bank are required to disclose the data and information relative to risk profile, risk management and capital funds.

The SCBT Group and the Bank have implemented a Pillar 3 policy and procedure framework to address the requirements laid down for Pillar 3 disclosure. The information provided has been reviewed and validated by senior management and the Risk Committee. In accordance with the SCBT Group and the Bank policy, the Pillar 3 disclosure will be published on the Standard Chartered Bank (Thai) PCL - website www.sc.com/th.

The BOT has also set the frequency of disclosure on semi-annual basis and annual basis. Quantitative data of Capital Structure & Adequacy and Market risk will be disclosed on a semi-annual basis. Whereas, the full Pillar 3 disclosures will be made annually on both qualitative and quantitative data

2. Scope of Application

In compliance with the requirement under Basel III Pillar 3 and sets of the BOT's disclosure requirements, the SCBT Group, which consists of the Standard Chartered Bank (Thai) PCL, Thai Exclusive Leasing Company Limited ("TEL"), Standard Chartered (Thailand) Limited ("SCT") and Standard Chartered (Thai) Asset Management Company Limited ("SCTAMC") have developed a set of disclosures for its position at both the Bank level (Solo basis) and the SCBT Group level (Full Consolidated basis) as at 30 June 2016 covering the following areas:

Qualitative and quantitative data for Capital and the minimum capital requirement for Credit risk, Market risk, Operational risk, and Equity in Banking Book exposure under AIRB.

3. Capital Management

The SCBT Group and the Bank's capital management approach is driven by its desire to maintain a strong capital base to support the development of the SCBT Group and the Bank business activities, to meet regulatory minimum capital requirements at all times and to maintain appropriate credit ratings.

The SCBT Group and the Bank's capital planning is dynamic and regularly refreshed to reflect the business forecasts as they evolve during the course of each year. The strategy-setting and planning is presented to the Board on an annual basis with regularly update on the financial outlook and performance as to the capital adequacy is aligned with the business plan. The capital plan takes the following into account:

- Current regulatory capital requirements and the SCBT Group and the Bank's assessment of on-going regulatory expectation.
- Demand for capital due to business growth forecasts, loan impairment outlook and market shocks or stresses
- Forecast demand for capital to support credit ratings and as a signaling tool to the market
- Available supply of capital and capital raising options

The Asset and Liabilities Management Committee ("ALCO") as appointed by Executive Committee ("EXCO") is responsible for the management of capital and liquidity and the establishment of and compliance with policies relating to balance sheet management, including management of the Bank's liquidity and capital adequacy.

4. Market Risk

Market risk is the potential for loss of earnings or economic value due to adverse changes in financial market prices or rates. The SCBT Group and the Bank's exposure to market risk arises predominantly from providing clients access to financial markets, facilitation of which entails the SCBT Group's taking moderate market risk positions. Market risk also arises in the non-trading book ("banking book") from the requirement to hold a large liquidity assets buffer of higher quality liquid debt securities and from the translation of non-Thai baht denominated

assets, liabilities and earnings. The objective of the SCBT Group and the Bank's market risk policies and processes is to achieve the optimal balance of risk and return while meeting customers' requirements.

The SCBT Group and the Bank undertake in the money market, foreign exchange markets and capital markets giving rise to market risk exposures. Other financial instruments undertaken include debt and other securities and certain financial derivative instruments. Derivative instruments are contracts whose characteristics and value are derived from underlying financial instruments, interest rates, exchange rates, or indices. They include futures, forwards, swaps, and options transactions in the foreign exchange and interest rate markets. Derivative contracts entered into by the SCBT Group and the Bank are primarily over-the-counter derivatives.

The SCBT Group and the Bank have established market risk management policies and framework, including limit setting, monitoring and reporting and control procedures, which are reviewed regularly by the relevant committees – ALCO, Risk committee and the Board. Market risk limits are proposed by the business within the terms of agreed policy. Risk officers and relevant committees review and approve the limits within delegated authorities, and monitor exposures against these limits. Risks are monitored against limits on a daily basis.

The primary categories of market risk for the SCBT Group and the Bank are:

- Interest rate risk: arising from changes in yield curves, credit spreads and implied volatilities on interest rate options.
- Equity price risk: arising from changes in the prices of equities, equity indices, equity baskets and implied volatilities on related options. For this category of market risk, the SCBT Group and the Bank currently do not trade equity.
- Currency exchange rate risk: arising from changes in exchange rates and implied volatilities on foreign exchange options; and
- Commodity price risk: arising from changes in commodity prices and commodity option implied volatilities; covering energy, precious metals, base metals and agricultural. For this category of market risk, the SCBT Group and the Bank is fully hedged through a back-to-back position.

**Standard Chartered Bank (Thai) PCL and Financial Business Group
Pillar 3 Consolidated Disclosures

The BOT specifies minimum capital requirements against market risk in the trading book. Interest rate risk in the non-trading book (“banking book”) is covered separately under the Pillar 2 framework. The minimum regulatory market risk capital requirements for the trading book are presented below.

TABLE 9: Minimum Capital Requirement for each Type of Market Risk under the SA Approach

Unit: Million Baht

Type of Risk	The SCBT Group		The Bank
