# Independent auditor's report To the management of Standard Chartered Bank, Macau Branch

We have audited the financial statements of Standard Chartered Bank, Macau Branch (the "Branch") set out on pages 3 to 49, which comprise the statement of financial position as at 31 December 2022, and the statement of profit or loss, the statement of comprehensive income, the statement of changes in reserve and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

## Management's responsibilities for the financial statements

The management of the Branch is responsible for the preparation of financial statements that give a true and fair view in accordance with Financial Reporting Standards promulgated by the Macau Special Administrative Region under Order of the Secretary for Economy and Finance No. 44/2020 ("Macau Financial Reporting Standards"), and for such internal control as management of the Branch determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

## **Auditor's responsibilities**

Our responsibility is to express an opinion on these financial statements based on our audit. Our report is made solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Auditing Standards issued by the Professional Committee of Accountants under the Notice No. 2/2021/CPC. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independent auditor's report (continued)
To the management of Standard Chartered Bank, Macau Branch

## **Opinion**

In our opinion, the financial statements give a true and fair view of the financial position of the Branch as at 31 December 2022, and of its financial performance and its cash flows for the year then ended in accordance with Macau Financial Reporting Standards.

CHAN Wai, CPA Ernst & Young Certified Public Accountants

Macao 8 May 2023

### NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

### 1. CORPORATE INFORMATION

Standard Chartered Bank, Macau Branch (the "Branch") was established on 9 May 1983 in the Macao Special Administrative Region of the People's Republic of China ("Macao SAR" or "Macao"). The registered office and principal place of business of the Branch is located at Unit 807, 8/F, Office Tower, Macau Landmark Avenida de Amizade, Z.A.P.E. Macao. The Branch's head office (the "Head Office") is Standard Chartered Bank, which is incorporated in the United Kingdom and registered in England and Wales.

The Branch is engaged in commercial banking business and provides related financial services.

### 2.1 STATEMENT OF COMPLIANCE

These financial statements have been prepared in accordance with Financial Reporting Standards promulgated by the Macao Special Administrative Region under the Order of the Secretary for Economy and Finance No. 44/2020 ("Macao Financial Reporting Standards" or "MFRSs").

### 2.2 BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

The Branch is a segment of Standard Chartered Bank and is not a separately incorporated legal entity. The Branch's financial statements have been prepared solely from the books and records of the Branch and reflect those transactions recorded locally. In addition, the assets of the Branch are legally available for the satisfaction of liabilities of Standard Chartered Bank, which are not reflected in the Branch's financial statements.

These financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets at fair value through other comprehensive income ("FVOCI"), financial assets and liabilities (including derivatives) at fair value through profit or loss, which are carried at fair value.

These financial statements are presented in Macao patacas ("MOP") which is also the functional currency of the Branch. All values are rounded to the nearest MOP thousands except when otherwise indicated.

## 2.3 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

Effective from 28 March 2020, the Macao Special Administrative Region has promulgated a number of new and revised MFRSs under Order of the Secretary for Economy and Finance No. 44/2020 with mandatory application for accounting periods beginning on or after 1 January 2022 and superseded the Macau Financial Reporting Standards under Administrative Regulation No. 25/2005. The Company adopted the following new and revised MFRSs in the financial statements in the current year.

## NOTES TO FINANCIAL STATEMENTS

## 31 December 2022

## 2.3 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES (continued)

MFRSs comprise of one Conceptual Framework for Financial Reporting, 15 International Accounting Standards (hereinafter "IFRS"), 26 International Accounting Standards (hereinafter "IAS") and 21 Interpretations. Amongst them, listed below are the titles of the 41 Standards and 21 Interpretations:

IAS 1	Presentation of Financial Statements
IAS 2	Inventories
IAS 7	Statement of Cash Flows
IAS 8	Accounting Policies, Changes in Accounting Estimates and Errors
IAS 10	Events after the Reporting Period
IAS 12	Income Taxes
IAS 16	Property, Plant and Equipment
IAS 17	Leases
IAS 19	Employee Benefits
IAS 20	Accounting for Government Grants and Disclosure of Government
	Assistance
IAS 21	The Effects of Changes in Foreign Exchange Rates
IAS 23	Borrowing Costs
IAS 24	Related Party Disclosures
IAS 26	Accounting and Reporting by Retirement Benefit Plans
IAS 27	Separate Financial Statements
IAS 28	Investments in Associates and Joint Ventures
IAS 29	Financial Reporting in Hyperinflationary Economics
IAS 32	Financial Instruments: Presentation
IAS 33	Earnings per Share
IAS 34	Interim Financial Reporting
IAS 36	Impairment of Assets
IAS 37	Provisions, Contingent Liabilities and Contingent Assets
IAS 38	Intangible Assets
IAS 39	Financial Instruments: Recognition and Measurement
IAS 40	Investment Property
IAS 41	Agriculture
IFRS 1	First-time adoption of International Financial Reporting Standards
IFRS 2	Share-based Payment
IFRS 3	Business Combinations
IFRS 4	Insurance Contracts
IFRS 5	Non-current Assets Held for Sale and Discontinued Operations
IFRS 6	Exploration for and Evaluation of Mineral Resources
IFRS 7	Financial Instruments: Disclosures
IFRS 8	Operating Segments
IFRS 9	Financial Instruments
IFRS 10	Consolidated Financial Statements
IFRS 11	Joint Arrangements
IFRS 12	Disclosure of Interests in Other Entities
IFRS 13	Fair Value Measurement
IFRS 14	Regulatory Deferral Accounts
IFRS 15	Revenue from Contracts with Customers

## NOTES TO FINANCIAL STATEMENTS

SIC Interpretation 32	Intangible Assets-Web Site Costs

- International Financial Reporting Interpretations Committee ("IFRIC")
- \*\* Standard Interpretations Committee ("SIC")

The adoption of the above new MFRSs has had no material impact on the accounting policies of the Branch and the methods of computation in the Branch's financial statements, except are described below:

## **IAS 1 - Presentation of Financial Statements**

IAS 1 introduces the statement of comprehensive income, with all items of income and expense recognised in profit or loss, together with all other items of recognised income and expense recognised directly in equity, either in one single statement, or in two linked statements. The Branch has elected to present two statements.

### NOTES TO FINANCIAL STATEMENTS

31 December 2022

## 2.3 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES (continued)

## IAS 24 – Related Party Disclosures

IAS 24 requires the Branch to make new disclosures necessary to draw attention to the possibility that its financial position and profit or loss may have been affected by the existence of related parties and by transactions and outstanding balances with such parties. These new disclosures are shown in note 23.

### IFRS 13 - Fair Value Measurement

IFRS 13 provides a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRSs. The standard does not change the circumstances in which the Bank is required to use fair value, but rather provides guidance on how fair value should be applied where its use is already required or permitted under other IFRSs. IFRS 13 is applied prospectively and additional disclosures required by IFRS 13 for the fair value measurements of investment properties and financial instruments are included in notes 24 to the financial statements.

The other new and revised IFRSs and interpretations have been applied for the first time in 2022, but did not have a material impact on the accounting policies of the Bank and the methods of computation in the Bank's financial statements.

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

## Interest revenue, interest expense and fees and commissions income

Net interest income and other gains or losses arising from financial instruments

Interest income for financial assets held at either FVOCI or amortised cost, and interest expense on all financial liabilities held at amortised cost is recognised in profit or loss using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest revenue or interest expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the gross carrying amount of the financial asset or the amortised cost of a financial liability. When calculating the effective interest rate other than credit impaired assets, the Branch estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider expected credit losses.

The calculation includes all amounts paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability and all other premiums or discounts.

Interest income for financial assets that are either held at FVOCI or amortised cost that have become credit impaired subsequent to initial recognition (stage 3), is recognised using the original effective interest rate applied to the net carrying value. Interest income is therefore recognised on the amortised cost of the financial asset including expected credit losses. Should the credit risk on a stage 3 financial asset improve such that the financial asset is no longer considered credit impaired, interest income recognition reverts to a computation based on the gross carry amount of the financial asset.

### NOTES TO FINANCIAL STATEMENTS

31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Interest revenue, interest expense and fees and commissions income (continued)

Net interest income and other gains or losses arising from financial instruments (continued)

Interest income and expense on financial instruments held at fair value through profit or loss is recognised within net trading income.

Gains and losses arising from changes in the fair value of financial assets and liabilities held at fair value through profit or loss, as well as any interest receivable or payable, are included in profit or loss in the period in which they arise.

Gain and losses arising from changes in the fair value of financial assets held at fair value through other comprehensive income other than foreign exchange gains and losses from monetary items, are recognised directly in reserve, until the financial asset is derecognised or impaired at which time the cumulative gain or loss previously recognised in reserve is recognised in the profit or loss, except for the financial assets in reserve irrevocably designated at fair value through other comprehensive income.

#### Fee and commissions income

Fee and commissions charged for services provided by the Branch are recognised as and when the service is completed or significant act performed. Loan syndication fees are recognised as revenue when the syndication has been completed and the Branch has retained no part of the loan package for itself or has retained a part at the same effective interest rate as for the other participants.

## Transaction Banking

The Branch recognizes fee income associated with transactional trade and cash management at the point in time the service is provided. The Branch recognizes income associated with trade contingent risk exposures (such as letters of credit and guarantees) over the period in which the service is provided.

Payment of fees is usually received at the same time the service is provided. In some cases, letters of credit and guarantees issued by the Branch have annual upfront premiums, which are amortised on a straight-line basis to fee income over the year.

### Financial instruments

Classification and measurement of financial instruments

## Classification

The Branch classifies its financial assets into the following measurement categories: amortised cost; fair value through other comprehensive income and fair value through profit or loss.

Financial liabilities are classified as either amortised cost or held at fair value through profit or loss. Management determines the classification of its financial assets and liabilities at initial recognition of the instrument or, where applicable, at the time of reclassification.

Derivatives are mandatorily held at fair value through profit or loss.

### NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### Financial instruments (continued)

Classification and measurement of financial instruments (continued)

### Classification (continued)

Debt instruments held at amortised cost or held at FVOCI have contractual terms that give rise to cash flows that are solely payments of principal and interest ("SPPI characteristics"). Principal is the fair value of the financial asset at initial recognition but this may change over the life of the instrument as amounts are repaid. Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period and for the other basic lending risks and costs, as well as a profit margin.

In assessing whether the contractual cash flows have SPPI characteristics, the Branch considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Branch considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Branch's claim to cash flow from specified assets (e.g. non-recourse asset arrangements); and
- features that modify the consideration of the time value of money e.g. periodical reset of interest rates.

Whether financial assets are held at amortised cost or FVOCI depend on the objectives of the business models under which the assets are held. A business model refers to how the Branch manages financial assets to generate cash flows.

The Branch makes an assessment of the objective of a business model in which an asset is held at the individual product business line, and where applicable within business lines depending on the way the business is managed and information is provided to management. Factors considered included:

- how the performance of the product business line is evaluated and reported to the Branch's management;
- how managers of the business model are compensated, including whether management is compensated based on the fair value of assets or the contractual cash flows collected;
- the risks that affect the performance of the business model and how those risks are managed;
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and expectations about future sales activity.

### NOTES TO FINANCIAL STATEMENTS

31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments (continued)

Classification and measurement of financial instruments (continued)

## Classification (continued)

Financial assets which have SPPI characteristics and that are held within a business model whose objective is to hold financial assets to collect contractual cash flow ("hold to collect") are recorded at amortised cost. Conversely, financial assets which have SPPI characteristics but are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets ("hold to collect and sell") are classified as held at FVOCI.

Both hold to collect and hold to collect and sell business models involve holding financial assets to collect the contractual cash flows. However, the business models are distinct by reference to the frequency and significance that asset sales play in meeting the objective under which a particular group of financial assets is managed.

Financial assets are measured at fair value through profit or loss if their contractual cash flows do not have SPPI characteristics or they are held within a business model other than the hold-to-collect or the hold-to-collect and sell business model.

Financial liabilities that are not financial guarantees or loan commitments and that are not classified as financial liabilities held at fair value through profit or loss are classified as financial liabilities held at amortised costs.

The Branch issues financial guarantee contracts and loan commitments in return for fees. Under a financial guarantee contract, the Branch undertakes to meet a customer's obligations under the terms of a debt instrument fi the customer fails to do so. Loan commitments are firm commitments to provide credit under prespecified terms and conditions. Financial guarantee contracts and loan commitments issued at below market interest rates are initially recognised as liabilities at fair value, whilst financial guarantees and loan commitments issued at market rates are recorded off balance sheet. Subsequently these instruments are measured at the higher of the expected credit loss provision, and the amount initially recognised less the cumulative amount of income recognised in accordance with the principles of IFRS 15 – Revenue from Contracts with Customers ("IFRS 15").

## **Initial recognition**

Purchases and sales of financial assets and liabilities held at fair value through profit or loss, and debt securities classified as financial assets held at fair value through other comprehensive income are initially recognised on the trade-date (the date on which the Branch commits to purchase or sell the asset). Loans and advances and other financial assets held at amortised cost are recognised on settlement date (the date on which cash is advanced to the borrowers). Financial liabilities, which include borrowings, not classified as held at fair value through profit or loss are classified at amortised cost on settlement date.

All financial instruments are initially recognised at fair value, which is normally the transaction price, plus directly attributable transaction costs for financial assets and financial liabilities which are not subsequently measured at fair value through profit or loss.

#### NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

## Financial instruments (continued)

Classification and measurement of financial instruments (continued)

#### Subsequent measurement

## Financial assets and financial liabilities held at amortised cost

Financial assets and financial liabilities held at amortised cost are subsequently carried at amortised cost using the effective interest method. Foreign exchange gains and losses are recognised in profit or loss.

#### Financial assets held at FVOCI

Debt instruments held at FVOCI are subsequently carried at fair value, with all unrealised gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in a separate component of reserve. Foreign exchange gains and losses on the amortised cost are recognised in profit or loss. Changes in expected credit losses ("ECL") are recognised in profit or loss and are accumulated in a separate component of reserve.

On derecognition, the cumulative fair value gains or losses, net of the cumulative ECL in reserve, are transferred to profit or loss.

## Financial assets and liabilities held at fair value through profit or loss

Financial assets and liabilities held at fair value through profit or loss are subsequently carried at fair value.

## Derecognition

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or where the Branch has transferred the asset and also substantially all of the associated risks and rewards of ownership. If substantially all the risks and rewards have been neither retained nor transferred and the Branch has retained control, the assets continue to be recognised to the extent of the Branch's continuing involvement. If substantially all the risks and rewards have been neither retained nor transferred and the Branch has lost control, the assets will be derecognised.

Where financial assets have been modified, the modified terms are assessed on a qualitative and quantitative basis to determine whether a fundamental change in the nature of the instrument has occurred, which determines whether the derecognition of the existing instrument and the recognition of a new instrument is appropriate.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of the consideration received (including any new asset obtained less any new liability assumed) and any cumulative gain or loss that had been recognised in other comprehensive income is recognised in profit or loss.

### NOTES TO FINANCIAL STATEMENTS

31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

## Financial instruments (continued)

Classification and measurement of financial instruments (continued)

## **Derecognition** (continued)

Financial liabilities are derecognised when they are extinguished. A financial liability is extinguished when the obligation is discharged, cancelled or expired.

#### Reclassifications

Financial liabilities are not reclassified subsequent to initial recognition.

Reclassifications of financial assets are made when, and only when, the business model for those assets changes. Such changes are expected to be infrequent and arise as a result of significant external or internal changes such as the termination of a line of business model is to realise the value of pre-existing held for trading assets through a hold to collect model.

Financial assets are reclassified at their fair value on the date of reclassification and previously recognised gains and losses are not restated. Moreover, reclassifications of financial assets between financial assets held at amortised cost and financial assets held at fair value through other comprehensive income do not affect effective interest rate or expected credit loss computations.

## **Impairment**

The Branch's ECL calculations are outputs of complex models with a number of underlying assumptions. The significant judgements and estimates in determining ECL include:

- the Branch's criteria for assessing if there has been a significant increase in credit risk;
- development of ECL models, including the choice of inputs relating to macroeconomic variables.

The calculation of ECL allowance also involves expert credit judgement to be applied by the credit risk management team based upon counterparty information they receive from various sources including relationship managers and external market information.

ECLs are determined for all financial debt instruments that are classified at amortised cost or fair value through other comprehensive income, loan commitments and financial guarantees issued.

An ECL represents the present value of expected cash shortfalls over the remaining life of a financial asset, undrawn commitment or financial guarantee.

A cash shortfall is the difference between the cash flows that are due in accordance with the contractual terms of the instrument and the cash flows that the Branch expects to receive (or pay in case of financial guarantee contracts) over the expected life of the instrument.

### NOTES TO FINANCIAL STATEMENTS

31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Impairment (continued)

#### Measurement

ECLs are computed as unbiased and probability weighted amount which are determined by evaluating a range of reasonably possible outcomes, the time value of money, and considering all reasonable and supportable information including information which is forward looking.

For material portfolios, the estimate of ECLs is determined by multiplying the probability of default ("PD") with the loss given default ("LGD") with the expected exposure at the time of default ("EAD").

Forward looking economic assumptions, such as GDP growth rates, interest rates, house price indices and commodity prices amongst others are incorporated into PD, LGD and EAD where relevant. These forecasts are determined using all reasonable and supportable information, which includes both internally developed forecasts and those available externally, and are consistent with those used for budgeting, forecasting and capital planning.

To account for the potential non-linearity in credit losses, multiple forward-looking scenarios are incorporated into the range of reasonably possible outcomes for all material portfolios.

For credit-impaired financial instruments, the estimate of cash shortfalls may require the use of expert credit judgement.

The estimate of expected cash shortfalls on a collateralised financial instrument reflects the amount and timing of cash flows that are expected from foreclosure on the collateral less the costs of obtaining and selling the collateral, regardless of whether foreclosure is deemed probable.

Cash shortfalls are discounted using the effective interest rate on the financial instrument as calculated at initial recognition or if the instrument has a variable interest rate, the current effective interest rate determined under the contract.

Instruments Location of ECL allowance

Financial assets held at amortised cost Netted against gross carrying value

Debt instruments at FVOCI Other comprehensive income (FVOCI Reserve)<sup>1</sup>

Loan commitments and financial guarantees issued Other liabilities<sup>2</sup>

### NOTES TO FINANCIAL STATEMENTS

31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment (continued)

#### **Measurement** (continued)

- Debt securities classified as fair value through other comprehensive income are held at fair value. The ECL allowance attributed to these instruments is accumulated in a separate reserve. Any fair value gains or losses are also accumulated within that reserve and is recycled to profit or loss when the applicable instruments are derecognised.
- ECL allowance for loan commitments and financial guarantees is recognised as a provision. Where a financial instrument includes both a loan (i.e. financial asset component) and an undrawn commitment (i.e. loan commitment component), and it is not possible to separately identify the ECLs on these components, ECLs on the loan commitment are recognised together with the ECL allowance for the financial asset. To the extent the combined ECLs exceed the gross carrying amount of the financial asset, the ECL is recognised as a provision.

## Recognition

## (1) 12-month ECLs (stage 1)

Expected credit losses are recognised at the time of initial recognition of a financial instrument and represent the cash shortfalls arising from possible default events up to 12 months into the future from the balance sheet date. Expected credit losses continue to be determined on this basis until there is either a significant increase in the credit risk of an instrument or the instrument becomes credit-impaired. If an instrument is no longer considered to exhibit a significant increase in credit risk, expected credit losses will revert to being determined on a 12-month basis.

## (2) Significant increase in credit risk (stage 2)

If a financial asset experiences a significant increase in credit risk ("SICR") since initial recognition, an ECL allowance is recognised for default events that may occur over the expected life of the asset.

Significant increase in credit risk is assessed by comparing the risk of default of an exposure at the reporting date to the risk of default at origination (after taking into account the passage of time). Whether a change in the risk of default is significant or not is assessed using a number of quantitative and qualitative factors, the weight of which depends on the type of products and counterparties.

Quantitative factors include an assessment of whether there has been a significant increase in the forward-looking PD since origination. A forward-looking PD is one that is adjusted for future economic conditions to the extent these are correlated to changes in credit risk. We compare the residual lifetime PD at the balance sheet date to the residual lifetime PD that was expected at the time of origination for the same point in the term structure and determine whether both the absolute and relative change between the two exceeds predetermined thresholds. To the extent that the differences between the measures of default outlined exceed the defined thresholds, the instrument is considered to have experienced a significant increase in credit risk.

### NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Impairment (continued)

#### **Recognition** (continued)

(2) Significant increase in credit risk (stage 2) (continued)

Qualitative factors assessed include those linked to current credit risk management processes, such as lending placed on non-purely precautionary early alert (and subject to closer monitoring).

A non-purely precautionary early alert account is one which exhibits risk or potential weaknesses of a material nature requiring closer monitoring, supervision, or attention by management. Weaknesses in such an account, if left uncorrected, could result in deterioration of repayment prospects and the likelihood of being downgraded. Indicators include a rapid erosion of position within the industry, concerns over management's ability to manage operations, weak/deteriorating operating results, liquidity strain and overdue balances amongst other factors.

## (3) Credit impaired (or defaulted) exposures (stage 3)

Financial assets that are credit impaired (or in default) represent those that are at least 90 days past due in respect of principal and/or interest. Financial assets are also considered to be credit impaired where the obligors are unlikely to pay on the occurrence of one or more observable events that have a detrimental impact on the estimated future cash flows of the financial asset. It may not be possible to identify a single discrete event but instead the combined effect of several events may cause financial assets to become credit impaired.

Evidence that a financial asset is credit impaired includes observable data about the following events:

- Significant financial difficulty of the issuer or borrower;
- Breach of contract such as a default or past due event;
- For economic or contractual reasons relating to the borrower's financial difficulty, the lenders of the borrower have granted the borrower concessions that lenders would not otherwise consider, which include forbearance actions;
- Pending or actual bankruptcy or other financial reorganisation to avoid or delay discharge of the borrower's obligations;
- The disappearance of an active market for the applicable financial asset due to financial difficulties of the borrower;
- Purchase or origination of a financial asset at a deep discount that reflects incurred credit losses.

### NOTES TO FINANCIAL STATEMENTS

31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Impairment (continued)

#### **Recognition** (continued)

(3) Credit impaired (or defaulted) exposures (stage 3) (continued)

Irrevocable lending commitments to a credit impaired obligor that have not yet been drawn down are also included within the stage 3 credit impairment provision to the extent that the commitment cannot be withdrawn.

Loss allowance for credit impaired financial assets are determined based on an assessment of the recoverable cash flows under a range of possible scenarios, including the realisation of any collateral held where appropriate. The loss allowance represents the present value of the cash shortfalls discounted at the instrument's original effective interest rate.

Write-offs of credit impaired instruments and reversal of impairment

To the extent a financial asset is considered irrecoverable, the applicable portion of the gross carrying value is written off against the related loss allowance. Such loans are written off after all the necessary procedures have been completed and it is decided that there is no reasonable expectation of recovery and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off decrease the amount of impairment loss in profit or loss.

## Derivative financial instruments

A derivative contract is initially recognised at fair value on the date on which it is entered into and is subsequently re-measured at its fair value. Fair values are obtained from market prices in active markets, including recent market transactions, and valuation techniques, including discounted cash flow models as appropriate. All derivatives are carried as assets when their fair values are positive and as liabilities when their fair values are negative.

Derivative transactions of the Branch do not qualify for hedge accounting. Changes in the fair value of any derivative that does not qualify for hedge accounting are recognised immediately in profit or loss.

## Leases

The leases entered into by the Branch are primarily operating leases. The total payments made under operating leases are charged to the profit or loss on a straight-line basis over the period of the leases.

### Cash and cash equivalents

For the purposes of the statement of cash flows, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including cash, balances and placements with banks and other financial institutions, and amounts due from group companies.

### NOTES TO FINANCIAL STATEMENTS

31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### Provisions and contingent liabilities

Provisions for restructuring costs and legal claims are recognised when the Branch has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of economic benefits will be required to settle the obligation and the amount can be reliably estimated.

Contingent liabilities are possible obligations arising from past events, whose existence will be confirmed only uncertain future events, or present obligations arising from past events that are not recognised because either an outflow of economic benefits is not probable or the amount of the obligation cannot be reliably measured. Contingent liabilities are not recognised but information about them is disclosed unless the possibility of any outflow of economic benefits in settlement is remote.

#### Income tax

Income tax payable on profits for the period is recognised as an expense in the period in which profits arise. The tax effects of income tax losses available for carry forward are recognised as an asset when it is probable that future taxable profits will be available against which these losses can be utilised.

Deferred tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates, and laws that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised where it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Current and deferred tax relating to items which are charged or credited directly to reserves are subsequently recognised in profit or loss together with the current or deferred gain or loss.

## Translation of foreign currencies

Foreign currency transactions are translated into Macao patacas using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies, are recognised in profit or loss.

Non-monetary assets and liabilities are translated at historical exchange rates if held at historical cost or year-end exchange rates if held at fair value, and the resulting foreign exchange gains and losses are recognised in either profit or loss or reserves depending on the treatment of the gain or loss on the asset or liability.

### NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### Related parties

A party is considered to be related to the Branch if:

- (a) A person, or a close member of that person's family, is related to the Branch if that person:
  - (i) has control or joint control over the Branch;
  - (ii) has significant influence over the Branch; or
  - (iii) is a member of the key management personnel of the Branch or the Head Office;

or

- (b) An entity is related to the Branch if any of the following conditions applies:
  - (i) The entity and the Branch are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
  - (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
  - (iii) Both entities are joint ventures of the same third party.
  - (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
  - (v) The entity is a post-employment benefit plan for the benefit of employees of either the Branch or an entity related to the Branch.
  - (vi) The entity is controlled or jointly controlled by a person identified in (a).
  - (vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).
  - (viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Branch or to the Head Office.

### NOTES TO FINANCIAL STATEMENTS

31 December 2022

## 2.4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### Fair value measurement

The Branch measures its derivative financial instruments, financial assets held at fair value and financial assets held at fair value through other comprehensive income at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Branch. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Branch uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 based on quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly
- Level 3 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Branch determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

### NOTES TO FINANCIAL STATEMENTS

31 December 2022

### 3. SIGNIFICANT ACCOUNTING ESTIMATES

The preparation of the Branch's financial statements requires management to make estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

#### Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below:

#### Income taxes

Significant estimates are required in determining the Branch's provision for income taxes. There are certain transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Branch recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

#### Impairment losses on financial assets

The measurement of impairment losses across all categories of financial assets in scope requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Branch's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The Branch's internal credit grading model, which assigns PDs to the individual grades
- The Branch's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a lifetime expected credit losses basis and the qualitative assessment
- The segmentation of financial assets when their ECL is assessed on a collective basis
- Development of ECL models, including the various formulas and the choice of inputs
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models

It has been the Branch's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

### NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

## 3. SIGNIFICANT ACCOUNTING ESTIMATES (continued)

## Estimation uncertainty (continued)

#### Fair value of financial instruments

The fair value of financial instruments is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e., an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, estimation is required in establishing fair values. Judgements and estimates include considerations of liquidity and model inputs related to items such as credit risk (both own and counterparty), funding value adjustments, correlation and volatility.

#### 4. INTEREST REVENUE

	2022 MOP'000	2021 MOP'000
Loans and advances to banks	3,526	33,374
Financial assets at fair value through	- /	,

ECL provision on loan commitments and financial		
guarantees (notes 21(a) and 26)	9	93
	286,196	590,895

## NOTES TO FINANCIAL STATEMENTS

### 31 December 2022

## 18. OTHER LIABILITIES (continued)

The movements in allowance for expected credit losses of loan commitments and financial guarantees are as follows:

	2022 MOP'000	2021 MOP'000
At beginning of year Credited to profit or loss	93 (84)	149 (56)
At end of year	9	93

## 19. RESERVES

## (a) Fair value through other comprehensive income

The fair value through other comprehensive income reserve comprises the cumulative net change in the fair value of the investment in debt securities measured at fair value through other comprehensive income, less the ECL allowance recognised in profit or loss.

## (b) Regulatory reserve

Regulatory reserve is established to satisfy the regulatory requirements Notice no.12/2021-AMCM issued by AMCM. Movement in this reserve is made directly through retained earnings. The movement in regulatory reserve for the year is as follows:

	2022 MOP'000	2021 MOP'000
(Reduction)/addition in provision under AMCM rules Deferred tax effect	(3,237)	12,121 (1,455)
	(2,849)	10,666

## NOTES TO FINANCIAL STATEMENTS

## 31 December 2022

## 20. CASH AND CASH EQUIVALENTS

Composition of cash and cash equivalents in the statement of cash flows:

	2022 MOP'000	2021 MOP'000
Cash and balances with banks and other financial	211.227	400 (20
institutions with original maturity less than three months Loans and advances to banks with original	311,226	498,638
maturity less than three months	-	1,074
Amounts due from head office, other branches and group companies which are balances		
and placements with banks	1,217,594	1,033,541
Less: Minimum deposit balance		
with AMCM	(24,045)	(32,837)
	1,504,775	1,500,416

## 21. CONTINGENT LIABILITIES AND COMMITMENTS

## (a) Contractual amount of contingent liabilities and commitments

The following is a summary of the contractual amounts of each significant class of contingent liabilities and commitments:

	2022 MOP'000	2021 MOP'000
Trade-related contingencies Other commitments which are	131,312	173,515
unconditionally cancellable	2,725,153	2,846,099
	2,856,465	3,019,614
Less: ECL provision (notes 18 and 26)	(9)	(93)
	2,856,456	3,019,521

The movements in allowance for expected credit losses of contractual amount of contingent liabilities and commitments are as follows:

	2022 MOP'000	2021 MOP'000
At beginning of year Credited to profit or loss	93 (84)	149 (56)
At end of year	9	93

#### NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

### 21. CONTINGENT LIABILITIES AND COMMITMENTS (continued)

## (a) Contractual amount of contingent liabilities and commitments (continued)

Contingent liabilities and commitments are credit-related instruments which include letters of credit, guarantees and commitments to extend credit. The risk involved is essentially the same as the credit risk involved in extending loan facilities to customers. These transactions are, therefore, subject to the same credit application, portfolio maintenance and collateral requirements as for customers applying for loans. The contractual amounts represent the amounts at risk should the contract be fully drawn upon and the client default. As the facilities may expire without being drawn upon, the contractual amounts do not represent expected future cash flows.

## (b) Lease commitments

At 31 December, the Branch had total future minimum lease payments under non-cancellable operating leases falling due as follows:

	2022 MOP'000	2021 MOP'000
<ul><li>Within one year</li><li>In the second to fifth years, inclusive</li></ul>	876 201	420 70
	1,077	<u>490</u>

The Branch leases certain of its office premises under operating lease arrangements. Leases for office premises are negotiated for terms ranging from one to two years. None of the leases includes contingent rentals.

#### 22. DERIVATIVE FINANCIAL INSTRUMENTS

The use of derivatives for trading and their sale to customers as risk management products is an integral part of the Branch's business activities. These instruments are also used to manage the Branch's own exposures to market risk as part of its asset and liability management process. The principal derivative instruments used by the Branch are foreign exchange related contracts, which are primarily over-the-counter derivatives. Most of the Branch's derivative positions have been entered into to meet customer demand. For accounting purposes, derivatives are classified as held for trading.

## (i) Notional amounts of derivatives

Derivatives are contracts whose value depends on the value of one or more underlying financial instruments, interest or exchange rates or indices. The notional amounts of these instruments indicate the volume of transactions outstanding and do not represent amounts at risk.

## NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

# 22. DERIVATIVE FINANCIAL INSTRUMENTS (continued)

(i) Notional amounts of derivatives (continued)

The following is a summary of the notional amounts of each significant type of derivatives entered into by the Branch:

	2022	2021
Exchange rate contracts	MOP'000	MOP'000
Forwards	21,383	7,302

(ii) Fair values of derivatives

	2	022	2021		
	Fair value assets <sup>1</sup> MOP'000	Fair value liabilities <sup>2</sup> MOP'000	Fair value assets <sup>1</sup> MOP'000	Fair value liabilities <sup>2</sup> MOP'000	
Exchange rate contracts	3	4		3	

<sup>&</sup>lt;sup>1</sup> The amount is included in other assets.

(iii) Credit risk weighted amounts of derivatives

	2022 MOP'000	2021 MOP'000
Exchange rate contracts		

Credit risk weighted amounts for 2022 and 2021 refer to the amounts as calculated in accordance with Notice 028/B/2015-DSB/AMCM.

<sup>&</sup>lt;sup>2</sup> The amount is included in other liabilities.

## NOTES TO FINANCIAL STATEMENTS

31 December 2022

#### 23. RELATED PARTY DISCLOSURES

(a) In addition to the transactions detailed elsewhere in these financial statements, the Bank had the following transactions with related parties during the year:

	2022 MOP'000	2021 MOP'000	
Operating Income Operating expenses	(30,244) 3,893	(25,429) 3,865	

(b) Compensation of key management personnel of the Branch

Details of compensation of key management personnel of the Branch are disclosed in note 7 to the financial statements.

#### 24. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

Valuation of financial assets and liabilities held at fair value are subject to a review independent of the business by Valuation Control. For those financial assets and liabilities whose fair value is determined by reference to externally quoted prices or market observable pricing inputs to valuation models, an assessment is made against external market data and consensus services. Financial instruments held at fair value in the statement of financial position have been classified into a valuation hierarchy that reflects the significance of the inputs used in the fair value measurements.

# NOTES TO FINANCIAL STATEMENTS

## 31 December 2022

# 24. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (continued)

## 24.1 Valuation of financial instruments carried at fair value

The tables below show the classification of financial instruments held at fair value into the valuation hierarchy set out as at 31 December:

31 December 2022	Level 1 Level 2 MOP'000 MOP'000		Level 3 MOP'000	Total MOP'000
Assets measured at fair value on a recurring basis Derivative financial				
instruments		3	<del>-</del>	3
Total financial assets measured at fair value		3		3
Liabilities measured at fair value on a recurring basis	ue			
Derivative financial instruments		4		4
Total financial assets measured at fair value		4		4
31 December 2021	Level 1 MOP'000	Level 2 MOP'000	Level 3 MOP'000	Total MOP'000
Assets measured at fair value on a recurring basis Financial assets at fair value				
through reserves		129,923		129,923
Total financial assets measured at fair value	<del>-</del>	<u>129,923</u>		129,923
Liabilities measured at fair value on a recurring basis	ue			
Derivative financial instruments		3		3
Total financial liabilities measured at fair value		3		3

#### NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

### 24. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (continued)

## 24.1 Valuation of financial instruments carried at fair value (continued)

During the year ended 31 December 2022, there were no transfers between Level 1 and Level 2, or transfers into or out of Level 3 (2021: Nil).

#### 24.2 Valuation of financial instruments carried at amortised cost

All financial instruments are stated at fair value or carrying amounts not materially different from their fair value as at 31 December 2022 and 2021.

The following sets out the Branch's basis of establishing the fair value of its financial assets and liabilities which are not carried at fair value.

#### Cash and balances with banks and other financial institutions

The fair value of cash and balances with banks and other financial institutions is their carrying amounts.

#### Loans and advances to banks

The fair value of floating rate placements and overnight deposits is their carrying amounts. The estimated fair value of fixed interest-bearing deposits is based on discounted cash flows using the prevailing money market rates for debts with a similar credit risk and remaining maturity.

### Loans and advances to customers

Loans and advances are net of provision for impairment. The estimated fair value of loans and advances represents the discounted amount of future cash flows expected to be received, including assumptions relating to prepayment rates and, where appropriate, credit spreads. Expected cash flows are discounted at current market rates to determine fair value.

#### Customers accounts

The estimated fair value of customers accounts with no stated maturity is the amount repayable on demand.

#### NOTES TO FINANCIAL STATEMENTS

31 December 2022

#### 25. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Branch's exposure to market risk (including interest rate risk and foreign currency risk), equity price risk, credit risk and liquidity risk arises in the normal course of its business. These risks are managed by the Branch's financial management policies and practices described below:

### (a) Credit risk management

Credit risk is the potential for loss due to the failure of a counterparty to meet its obligation to pay in accordance with agreed terms. Credit exposures arise from both the banking and trading books.

Credit risk is managed through a framework that sets out policies and procedures covering the measurement and management of credit risk. There is a clear segregation of duties between transaction originators in the businesses and the approvers in the Risk function. All credit exposures limits are approved within a defined credit approval authority framework. The Branch manages its credit exposures following the principle of diversification across products, geographies, industries, collateral types and client segments.

A standard alphanumeric credit risk-grade system for quantifying the risk associated with a counterparty is used. The numeric grades run from 1 to 14 and some of the grades are further subclassified. Lower credit grades are indicative of a lower likelihood of default. Credit grades 1 to 12 are assigned to performing customers or accounts, while credit grades 13 and 14 are assigned to non-performing or defaulted customers.

The Branch monitors credit exposures, portfolio performance, and external trends that may impact risk management outcomes. Internal risk management reports contain information on key environmental, political and economic trends across major portfolios; portfolio delinquency and loan impairment performance; as well as credit grade migration.

#### Credit concentration risk

Credit concentration risk exists when changes in geographic, economic or industry factors similarly affect groups of counterparties whose aggregate credit exposure is material in relation to the Branch's total exposures. Analysis of geographical and industry concentration of the Branch's gross loans and advances to customers is disclosed in note 12(c).

#### Maximum exposure to credit risk

The maximum exposures to credit risk of on-balance sheet financial instruments, before taking account of any collateral or other credit enhancements, are the carrying amount reported on the balance sheet. For off-balance sheet instruments, the maximum exposure to credit risk, excluding loans commitments which are unconditionally cancellable, represents the contractual nominal amounts as disclosed under "Contractual amount of contingent liabilities and commitments" in note 21(a).

#### NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

### 25. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

## (b) Market risk management

Market risk is the potential for loss of economic value due to adverse changes in financial market rates or prices. The Branch's exposure to market risk arises predominantly from providing clients access to financial markets. facilitation of which entails the Branch taking minimal market risk positions. There are no proprietary trading teams. Hence income earned from market risk related activities is primarily driven by the volume of client activity rather than risk-taking.

The primary categories of market risk for the Branch are:

- Interest rate risk: arising from changes in yield curves; and
- Foreign exchange rate risk: arising from changes in currency exchange rates.

The Hong Kong Traded Risk Management ("TRM") independently identifies and monitors the market risk arising from the Branch's activities. The Asset and Liability Committee ("ALCO") is responsible for overseeing the effective implementation of policies and other standards for the control of market risk.

#### Value at Risk

The Branch uses a Value at Risk (VaR) model to measure the risk of losses arising from future potential adverse movements in market rates, prices and volatilities. VaR is a quantitative measure of market risk that applies recent historical market conditions to estimate the potential future loss in market value that will not be exceeded in a set time period at a set statistical confidence level. VaR provides a consistent measure that can be applied across trading businesses and products over time and can be set against actual daily trading profit and loss outcome.

For day-to-day risk management, VaR is calculated as at the close of business for expected movements over a minimum of one business day and to a confidence level of 97.5 percent. Intraday risk levels may vary from those reported at the end of the day.

Management VaR allows SCB to manage the market risk across the trading book and most of the fair valued non-trading books. The scope of instruments included in the Management VaR excludes the instruments held at amortised cost.

#### (i) Foreign exchange risk

Foreign exchange trading exposures are principally derived from customer driven transactions. Foreign exchange risk in the non-trading book is minimised by matching funding assets and liabilities in the same currency.

	2022 MOP'000	2021 MOP'000
Total net long/(short) position in foreign currencies	545	(495)

# NOTES TO FINANCIAL STATEMENTS

## 31 December 2022

# 25. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

- (b) Market risk management (continued)
- (i) Foreign exchange risk (continued)

Significant foreign currency exposures which exceeded 10% of the net position in all foreign currencies are as follows:

XXX 4.11	2022 MOP'000	2021 MOP'000

## NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

## 25. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

- (b) Market risk management (continued)
- (ii) Interest rate risk in the non-trading book

Interest rate re-pricing risk in the banking book is managed by Hong Kong Treasury Markets.

(c) Liquidity and funding risk

Liquidity and funding risk is the risk that we may not have sufficient stable or diverse sources of funding to meet our obligations as they fall due.

The Branch's liquidity risk framework requires the Branch to ensure that it operates within predefined liquidity limits and remains in compliance with the liquidity policies and practices, as well as local regulatory requirements.

The Branch achieves this through a combination of risk limits setting, policy formation, risk measurement and monitoring, stress testing governance and review.

ALCO ensures the Branch remains in compliance with liquidity policies and practise as well as local regulatory requirements.

#### NOTES TO FINANCIAL STATEMENTS

#### 31 December 2022

## 25. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

#### (d) Fair value

All financial instruments are stated at fair value or carried at amounts not materially different from their fair values as at 31 December 2022 and 2021 unless otherwise stated.

#### (i) Financial assets

The Branch's financial assets mainly include cash, amounts due from banks and other financial institutions, loans and advances to customers, and financial assets at fair value through equity.

Amounts due from banks and other financial institutions, loans and advances to customers

Amounts due from banks and other financial institutions, loans and advances to customers are mainly priced at market interest rate or will mature within one year. Accordingly, the carrying values approximate the fair values.

Financial assets at fair value through other comprehensive income

Financial assets at fair value through other comprehensive income are stated at fair value in the financial statements.

#### (ii) Financial liabilities

The Branch's financial liabilities mainly include amounts due to banks and other financial institutions and deposits from customers.

Deposits and balances with banks and other financial institutions, deposits from customers

Deposits and balances with banks and other financial institutions, deposits from customers are mainly priced at market interest rate or will mature within one year. Accordingly, the carrying values approximate the fair values.

These notes set out on pages 50 to 59 are supplementary to and should be read in conjunction with the financial statements set out on pages 3 to 49. The financial statements and these unaudited supplementary financial information ("supplementary notes") taken together comply with the Guideline on Disclosure of Financial Information made under Circular No. 026/B/2012-DSB/AMCM.

## (a) Brief management report on Branch's activities in Macau

Management are pleased to announce the results of the Branch for the year ended 31 December 2022.

## Principal activities

The Branch is part of Standard Chartered Bank, which is incorporated in the United Kingdom and registered in England and Wales. The Branch's principal activities are the provision of commercial banking and related financial services.

#### 2022 Results

Loss before tax is MOP 2.445 million for which it was MOP 14.298 million profit before tax for the period ended 31 December 2021. Net interest income decreased by 33.70 per cent to MOP 22.174 million. Other revenue including fee and commission income decreased by MOP 7.073 million in 2022. Total operating income decreased by 51.10 per cent to MOP 17.303 million.

Operating expenses decreased 7.45 per cent in 2022 to MOP 20.141 million. Impairment release was MOP 0.393 million in 2022 when comparing to impairment release of MOP 0.674 million in 2021. Loss after taxation was MOP 2.037 million, a decrease of MOP 14.955 million over the profit after taxation of MOP 12.918 million recorded in 2021.

(d) Overdue loans and advances to customers

At the end of the reporting period, there were no overdue loans and advances to customers (2021: Nil).

(e) Operational and Technology risk management

Operational and Technology risk is the potential for loss from inadequate or failed internal processes, technology events, human error, or from the impact of external events, (including legal risks). Operational and Technology risk is managed within the boundary of the Risk Appetite Statement approved by the Board. The Group aims to control operational and technology risks to ensure that operational losses (financial or reputational), including any related to conduct of business matters, do not cause material damage to the Group's franchise.

Operational and Technology risks can arise from all business lines and functions and thus from all activities carried out by the Branch. Although operational risk exposures can take many varied forms, the Branch seeks to manage them in accordance with standards that drive systematic risk identification, assessment, control and monitoring. The Branch achieves this by mapping all activities across the Group into a set of processes with key control standards defined to mitigate risks. The Branch benchmark practices against peers, other industries and regulatory requirements.

The Bank uses operational and technology risk sub-types principally as an aid to ensure comprehensive and consistent identification of operational risks, wherever they may arise.

Operational and Technology Risk is classified into the following risk sub-types to enable effective risk identification and assessment.

# (e) Operational and Technology risk management (continued)

# Operational and Technology risk subtypes

Execution	Transaction	Potential for loss due to failure in the design or execution of client facing
Capability	processing	transactions.
	Product	Potential for loss due to the failure to design and/or meet product management
	management	standards and product-related regulatory requirements
Operational	Client service	Potential for loss or adverse impact due to failures in design or maintenance of
Resilience	resilience	appropriate resilience measures for client services and underlying
		infrastructure and controls to withstand operational disruptions.
	Technology risk	Potential loss or adverse impact due to technology failure (hardware, software, networks)
	Change	Potential for loss or adverse impact due to failures to manage project related
	management	change.
	People	Potential for loss due to the failure to meet standards for people management
	management	including relevant regulations (e.g. employment, remuneration and benefits).
	Safety and security	Potential for loss or damage due to failure to create a safe, secure, and healthy environment for staff and clients. This risk considers both the protection of property and physical assets, health and safety standards, and resilience requirements
Governance	Corporate	Potential for loss due to:
	governance	<ul> <li>(i) non-compliance with relevant laws, regulations, ordinances, market guidance, corporate governance codes and exchange listing requirements relating to corporate administration and board governance, OR,</li> <li>(ii) failure to have an appropriate framework for the delegation of authority from the board of an entity.</li> </ul>
		Any risks from non-compliance with listing rules relating to remuneration, financial reporting, tax and capital requirements, or with company laws and regulations relating to financial records or reporting are outside the scope of this risk sub-type.
	Enterprise risk	Potential for loss or adverse impact due to the failure or ineffective
	governance	implementation of the principles and standards for enterprise risk management framework
Reporting and	Financial books	Potential for loss or adverse impact due to failure to comply with laws and
Obligations	and records	regulations for financial books and records.
	Financial	Potential for loss or adverse impact due to failure to comply with applicable
	regulatory	financial regulatory reporting laws and regulations.
	reporting	
	Tax	Potential for loss or adverse impact due to failure to comply with laws and
	obligations	regulations for tax.
Legal enforceab		The potential for loss due to difficulty in enforcing the Group's contractual
		rights

# (e) Operational and Technology risk management (continued)

The Hong Kong Executive Committee oversees the management of operational and technology risks across the Branch, supported by business, functional, and country-level committees/forums. All operational risk committees/forums operate on the basis of a defined structure of delegated authorities and terms of reference derived from the Hong Kong Executive Risk Committee.

Compliance with operational risk policies and standards is the responsibility of all staff within the Bank.

## (f) Liquidity risk

	January to December 2022 MOP'000	January to December 2021 MOP'000
