Standard Chartered Bank (Thai) PCL
Pillar 3 Disclosures
30 June 2026

1. Scope of Basel III Framework

Pillar 1: Minimum Capital Requirement

The BOT has approved Standard Chartered Bank (Thai) PCL (“the Bank”) to adopt the AIRB approach which is more advanced under Enterprise Risk Management Framework for the measurement of credit risk capital. Under the notification, the Bank has been using AIRB approach for the credit risk capital calculation as regulatory capital since December 2009.

The first of the three pillars of the Basel framework provide the approach to calculation of the minimum capital requirements for credit, market and operational risk.

Pillar 2: Supervisory Review Process

Pillar 2 requires banks to undertake a comprehensive assessment of their risks and to determine the appropriate amounts of capital to be held against these risks where other suitable mitigants are not available. This risk and capital assessment are commonly referred to as an Internal Capital Adequacy Assessment Process (“ICAAP”) which covers much broader risk types than Pillar 1, which covers only credit risk, market risk, and operational risk.

The Bank has developed an ICAAP policy and framework which closely integrates the risk and capital assessment processes and ensures that adequate levels of capital are maintained to support the Bank’s current and projected demand for capital under expected and stressed conditions.

Under Pillar 2, the BOT would undertake a review of the Banks’ ICAAP. This is referred to as the Supervisory Review and Evaluation Process (“SREP”).

Pillar 3: Market Discipline

Pillar 3 aims to provide a consistent and comprehensive disclosure framework that enhances comparability between banks and further promotes improvements in risk management. Pillar 3 requires all material risks to be disclosed, enabling a comprehensive view of the bank’s risk profile.

Standard Chartered Bank (Thai) PCL

Pillar 3 Disclosures

30 June 2026

The Bank has implemented a Pillar 3 policy and procedure framework to address the requirements laid down for Pillar 3 disclosure. The information provided has been reviewed and validated by senior management and the Executive Risk Committee. In accordance with the Bank's policy, the Pillar 3 disclosure will be published on the Standard Chartered Bank (Thai) PCL - website www.sc.com/th.

The BOT has also set the frequency of disclosure on semi-annual and annual basis. Quantitative data of Key Prudential Metrics, Capital Structure & Adequacy and Market risk will be disclosed on a semi-annual basis, whereas the full Pillar 3 disclosures will be made annually on both qualitative and quantitative data.

2. Scope of Application

In compliance with the requirement under Basel III Pillar 3 and sets of the BOT's disclosure requirements, the Bank has developed a set of disclosures for its position as at 30 June 2026 covering the following areas:

- Quantitative data of Key Prudential Metrics, Capital Structure & Capital Adequacy.
- Market Risk

3. Key Prudential Metrics

The table below provides the key prudential metrics related to regulatory capital and liquidity standards.

Table 1: Key Prudential Metrics	30-Jun-26	31-Dec-25
Capital (Unit: Million Baht)		
1 Common equity tier 1 (CET1) capital	20,574	21,150
1A Fully loaded ECL CET 1	20,574	21,150
2 Tier 1 capital	20,574	21,150
2A Fully loaded ECL Tier 1	20,574	21,150
3 Total capital	20,840	21,401
3A Fully loaded ECL total capital	20,840	21,401
Risk weighted assets (Unit: Million Baht)		
4 Total risk weighted assets	86,765	78,809
Capital adequacy ratio (Unit: Percentage)		
5 Common equity tier 1 (CET1) ratio	23.71	26.84
5A Fully loaded ECL CET1 ratio	23.71	26.84
6 Tier 1 ratios	23.71	26.84
6A Fully loaded ECL Tier 1 ratio	23.71	26.84
7 Total capital ratios	24.02	27.16
7A Fully loaded ECL total capital ratio	24.02	27.16
Additional capital adequacy ratio (Unit: Percentage)		
8 Capital Conservation buffer	2.50	2.50
9 Counter cyclical buffer	-	-
10 Higher loss absorbency	-	-
11 Total additional capital adequacy ratios (item 8+ 9 + 10)	2.50	2.50
12 CET1 after maintenance of minimum capital requirement	16.71	19.84
Liquidity coverage ratio (LCR)		
13 Total high-quality liquid assets (HQLA) (Unit: Million Baht)	99,891	93,162
14 Total net cash outflows (within a 30-day period) (Unit: Million Baht)	47,982	35,472
15 LCR (Unit: Percentage)	209	265

Standard Chartered Bank (Thai) PCL

Pillar 3 Disclosures

30 June 2026

The Bank applies the fully loaded Expected Credit Loss since 1 January 2020 under TFRS 9. Under this approach, the capital adequacy ratios as of 30 June 2026 and 31 Dec 2025 were higher than the BOT's minimum capital ratios including capital buffer requirement at 7.0% for CET1, 8.5% for Tier1 and 11.0% for Total Capital Ratio.

The Bank's average LCR for Q2 of 2026 (B.E.2569) is 209%, calculated from the LCR at the end of April, May, and June. The Bank LCR remains well above the Bank of Thailand's minimum requirement of 100%. The LCR consists of 2 main components, namely;

1. High-Quality Liquid Asset (HQLA) include unencumbered high-quality assets with low risk and low volatility that can be easily monetized without any significant changes to their values, even in times of liquidity stress. The value of each type of HQLA is after the application of both haircuts and any applicable caps as specified by the BOT. The average HQLA of the Bank for Q2 of 2026 is THB 99,891 million, which is the average of HQLA as at the end of April, May, and June. These HQLA primarily consists of Level 1 assets, which are cash and Government bonds. On this basis, the Bank holds several types of high-quality liquid assets to ensure the diversification of the stock of HQLA.

2. The amount of net cash outflows (net COF) is equal to expected cash outflows within the 30-day time horizon minus expected cash inflows within the 30-day time horizon under liquidity stress scenarios; but the expected cash inflows must not exceed 75% of the expected cash outflows. The average net COF of the Bank for Q2 of 2026 is THB 47,982 million, which is the average of net cash outflows within the 30-day time horizon as at the end of April, May, and June. The expected cash outflows on which the Bank focuses under the severe liquidity stress scenarios are the run-off of wholesales deposits and borrowings, repayments of secured borrowings under repurchase agreements (repos), to which the run-off rates as specified by the Bank of Thailand have been assigned. On the other hand, expected cash inflows are mostly from loan repayments from high-quality customers, and maturing debt securities, to which the inflow rates as specified by the Bank of Thailand have been assigned.

Standard Chartered Bank (Thai) PCL
Pillar 3 Disclosures
30 June 2026

4. Capital Management

The Bank's capital management approach is driven by its desire to maintain a strong capital base to support the development of the Bank's business activities, to meet regulatory minimum capital requirements at all times and to maintain appropriate credit ratings.

The Bank's capital planning is dynamic and regularly refreshed to reflect the business forecasts as they evolve during the course of each year. The strategy setting and planning are presented to the Board on an annual basis with regular updates on the financial outlook and performance to ensure capital adequacy is aligned with the business plan. The capital plan takes the following into account:

- Current regulatory capital requirements and the Bank's assessment of on-going regulatory expectations.
- Demand for capital due to business growth forecasts, loan impairment outlook and market shocks or stresses.
- Available supply of capital and capital raising options.

The Asset and Liability Management Committee ("ALCO") as appointed by Executive Committee ("EXCO") is responsible for determining the Bank's balance sheet strategy and for ensuring that, in executing the Bank's strategy, the Bank operates within Risk Appetite (RA) and regulatory requirements relating to capital, loss-absorbing capacity, liquidity, Interest Rate Risk in the Banking Book (IRRBB), Banking Book Basis Risk and Structural Foreign Exchange Risk. ALCO is also responsible for ensuring that internal and external recovery planning requirements are met.

4.1 Capital Structure

The Bank maintains capital to meet the minimum regulatory capital requirements set by the BOT. In addition, the Bank assesses its capital adequacy to support current and future business activities.

The following table is a breakdown of total regulatory capital of the Bank as at 30 June 2026, compared with the position of the Bank as at 31 December 2025.

4.3 Capital Adequacy

Under the BOT guidelines, the Bank is required to maintain a minimum ratio of total capital to risk weighted assets of 11.00%, with the minimum ratio of Tier 1 capital and Common Equity Tier 1 to risk weighted assets at 8.50% and 7.00%, respectively.

Standard Chartered Bank (Thai) PCL
Pillar 3 Disclosures
30 June 2026

Total Capital Adequacy Ratio of the Bank as at 30 June 2026 was 24.02%. Tier 1 Ratio was 23.71% and CET 1 Capital Ratio was 23.71% which exceeded minimum requirements of the BOT.

Table 4: Capital Adequacy

Unit: Percent

	BOT Minimum Requirement	BOT Minimum Requirement and conservation buffer	30-Jun-26	31-Dec-25
Total capital funds to risk weighted assets	8.50	11.00	24.02	27.16

AIRB Adoption

The Bank uses AIRB approach to calculate credit risk for material portfolios whilst SA approach is applied to portfolios that are classified as permanently exempt from the AIRB approach as well as those portfolios that are currently under transition to the AIRB approach.

The following tables show Minimum Capital Requirement for Credit Risk Classified by Asset Classes under AIRB (table 6), Minimum Capital Requirement for Credit Risk Classified by Asset Classes under SA (table 7) and Minimum Capital Requirement for Equity Exposure under AIRB (table 8).

Table 6: Minimum Capital Requirement for Credit Risk Classified by Asset Classes under AIRB

Asset Class	Unit: Million Baht	
	30-Jun-26	31-Dec-25
Non-Default exposures		
Claims on sovereigns, financial institutions and Corporates	3,669	3,467
Claims on retail portfolios		
-Claims on residential mortgage	-	-
-Qualifying revolving retail exposures	-	-
-Other retail exposures	-	-
Equity exposures	1	1
Other assets	108	96
Default exposures	-	1

30 June 2026

5. Market Risk

Market risk is the potential for loss of earnings or economic value due to adverse changes in financial market prices or rates. The Bank's exposure to market risk arises predominantly from providing clients access to financial markets, facilitation of which entails the Bank's taking moderate market risk positions. Market risk also arises in the non-trading book ("banking book") from the requirement to hold a large liquidity assets buffer of higher quality liquid debt securities. The objective of the Bank's market risk policies and processes is to achieve the optimal balance of risk and return while meeting customers' requirements.

The Bank undertakes transactions in the money market, foreign exchange markets and capital markets giving rise to market risk exposures. Other financial instruments undertaken include debt and other securities and certain financial derivative instruments. Derivative instruments are contracting whose characteristics and value are derived from underlying financial instruments, interest rates, exchange rates, or indices. They include futures, forwards, swaps, and options transactions in the foreign exchange and interest rate markets. Derivative contracts entered into by the Bank are primarily over-the-counter derivatives.

The Bank has established market risk management framework that covers limit setting, monitoring and reporting and control procedures, which are reviewed regularly by the relevant committees, Executive Risk Committees and the Board. Market risk limits are proposed by the business within the terms of agreed policy. Risk officers and relevant committees review and approve the limits within delegated authorities and monitor exposures against these limits. Risks are monitored against limits on a daily basis.

The primary categories of market risk for the Bank are:

- Interest rate risk: arising from changes in yield curves, credit spreads and implied volatilities on interest rate options;
- Currency exchange rate risk: arising from changes in exchange rates and implied volatilities on foreign exchange options; and

Standard Chartered Bank (Thai) PCL
Pillar 3 Disclosures
30 June 2026

- Commodity price risk: arising from changes in commodity prices and commodity option implied volatilities; covering energy, precious metals, base metals and agricultural. For this category of market risk, the Bank is fully hedged through a back-to-back position.

The BOT specifies minimum capital requirements against market risk in the trading book. Interest rate risk in the non-trading book (“banking book”) is covered separately under the Pillar 2 framework. The minimum regulatory market risk capital requirements for the trading book are presented below.

Table 9: Minimum Capital Requirement for each Type of Market Risk under the SA Approach

Unit: Million Baht		
Type of Risk	30-Jun-26	31-Dec-25
Interest Rate Risk	2,243	1,852
Equity Position Risk	-	-
Foreign Exchange Rate Risk	178	64
Commodity Risk	-	-
Total Minimum Capital Requirements	2,421	1,916

The Bank is required to have THB 2,421 million total capital against Market Risk. Compared to December 2025, the marginal increase of THB 505 million is due to increase in Interest Rate Risk charge of THB 391 million and Foreign Exchange Risk by THB 114 million due to higher open positions.
