5.4 The Bank will pay interest every month or every 6 months to each account under this product. Interest will be calculated based on the period of deposit from the date following the last interest payment date to the interest payment due date.

5.5 Interest rate paid may be higher than the announced interest rate for each type of account on a case by case basis, if Client use Domestic Notional Aggregation Product with Tier Pricing product features.

5.6 Interest calculation of Domestic Notional Aggregation Product are as follows:

5.6.1 End-of-day balance of each account under the Domestic Notional Aggregation Product will be converted to agreed Based Currency.

5.6.2 Balance of each account in Based Currency will be notionally aggregated to determine Interest Tier Pricing.

5.6.3 Interest payment will be calculated on balance in each account and currency based on Interest Tier Pricing determined by total balance.

5.6.4 For regular year with 365 days, interest paid on each account = End of Day Deposit Balance in each currency
x Interest Rate (%) x (Number of Deposit Days/365)

5.6.5 For leap year with 366 days, interest paid on each account = End of Day Deposit Balance in each currency
x Interest Rate (%) x (Number of Deposit Days/366)
