Minimum capital requirements - This includes the Basel base minimum of 8%, plus Pillar 2A capital requirement, plus any applicable Basel buffers.

Market risk decreased during the reporting period, primarily reflecting a higher net open position in USD. Counterparty credit risk increased, driven by higher trading volumes. The credit valuation adjustment (CVA) reflects new trading activity, with exposures shifting across different runoff portfolios/sectors. Movements in expected credit losses (ECL) contributed to changes in below-threshold deduction amounts.
